

Inframatic 9520

Dedicated NIR Flour Analyzer

Perten Instruments

Perten Instruments has provided analysis instruments to flour millers and professional bakers for more than 50 years.

Perten has been an NIR instrument supplier for 30+ years. The Inframatic 9520 is our most recent one designed specifically for flour and semolina.

IM 9520 - Overview

- Dedicated flour and semolina instrument
- Operator independent sample preparation
- Analysis result in 30 seconds
- Ready to use calibrations
- Remote instrument management

Dedicated

- Flour Millers
 - Monitor and optimize yield
 - Ensure out-going flour meets customer's needs
 - Reduce returns and claims
- Professional bakers
 - Ensure you get what you pay for
 - Make necessary adjustments to specifications

Ready to use calibrations

Wheat flour

- Moisture
- Protein
- Ash
- Wet gluten
- Zeleny
- Colour L
- Others on request

Semolina

- Moisture
- Protein
- Ash
- Colour L
- Colour b

Rye flour

- Moisture
- Protein
- Ash

Calibration database built up over 5 years

Flour Analysis

- Bench-top analysis
- Ease of use – Intuitive menus and large colour touch screen
- Rapid analysis – Results in 30 seconds
- Reproducible sample presentation
- Operator independent

Reference Pellet Check Sample

- Use your own daily check samples or:
Use the Reference Pellet Check Sample
(Accessory)
- Verifies the IM9500 matches
factory standards - Quality
Assurance for ISO or other
QA systems.

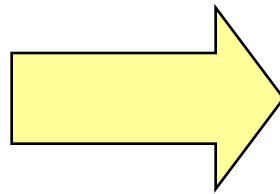

Technology

- The Inframatic 9520 uses light to determine for example moisture or protein content in flour.
- It uses Near Infrared light transmitted through the sample
 - Near Infrared Transmission = NIT
- Secondary method, needs to be calibrated
