WELCOME MESSAGE IAOM MEA 2017 CONFERENCE CHAIRMAN

This is the fourth occasion, since 1992, that I am pleased to welcome you all in Dubai for the 28th Annual IAOM MEA Region Conference & Expo on 22–25 October 2017 in Sheikh Rashid Hall of the Dubai World Trade Centre (DWTC), UAE. The hall will have a dedicated B2B Lounge in

addition to the conference, expo and lunch area focusing on facilitating networking among our delegates, exhibitors and visitors. The conference program has been revitalised featuring unique subjects on the flour & feed milling technical aspects, new developments, and trading & finance. This year, we are delighted to announce that Dan Basse, President and Founder of AgResource Co. (USA) will return as Trading Keynote Speaker and Moderator sharing his valuable insights on current global supply and demand forecasts.

Dubai, which is often called the city of gold, is a stirring alchemy of profound traditions and ambitious futuristic vision. It is a bustling microcosm peacefully shared by cultures from all corners of the world. This diversity expresses itself in the culinary landscape, fashion, music and performance. Although rooted in Islamic tradition, it is one open society where it is easy for visitors to connect with a myriad of experiences.

Our exclusive hotel partner, the JW Marriott Marquis Hotel Dubai is located at the newly inaugurated Dubai Water Canal and is conveniently connected to the Dubai Metro. Discounted rates are offered exclusively to IAOM MEA delegates.

We are honoured and privileged to host this event in Dubai and are delighted to welcome our valued delegates, exhibitors and sponsors.

Very Truly Yours

Essa Al Ghurair IAOM MEA 2017 Dubai Conference Chairman Chairman, Essa Al-Ghurair Investment (UAE)

Made from premium 100% pure M.P. Sharbati wheat, each lustrous, golden-hued grain is selected and harvested with great love and care, making your rotis softer, flavoursome and tastier like none other.

Bring home Al Baker Gold Chakki Fresh Atta and give your family the ultimate taste of rotis.

WELCOME MESSAGE IAOM MEA REGIONAL DIRECTOR

Thank you for joining the 28th Annual International Association of Operative Millers Mideast & Africa Region Conference & Expo on 22-25 October 2017 in Sheikh Rashid Hall, Dubai World Trade Centre, UAE.

IAOM MEA is honored to have Egypt's Minister of Supply and Internal Trade, His Excellency Dr Ali Elsayed Ali Elmoselhy, in this year's panel discussion,

"Wheat Imports: MEA Regional Outlook." Moderated by AgResource Co. President, Daniel Basse, the panel discussion gathers wheat importers from Egypt, Iran, Tunisia, Turkey and UAE to discuss reliability, sustainability and diversification of the Middle East and Africa's wheat suppliers against the backdrop of political and economic changes in the region and across the globe.

The technical session is headlined by Buhler's Food Safety Officer, Dr Beatrice Conde-Petit, who will deliver a keynote speech, "Gluten-free Diet: Facts, Fiction & Food Processing Challenges."

One week before our big gathering in Dubai World Trade Centre's most prestigious hall, Sheikh Rashid Hall, IAOM MEA organized a highly demanded 5-day Arabic milling course attended by 34 millers from Egypt, Iraq, Jordan, Kuwait, Lebanon, Oman, Saudi Arabia, and UAE. Similar training courses and forums are being developed for next year.

IAOM MEA also completed the Arabic translation of IAOM Correspondence Course, which is comprised of eight units encompassing all aspects of flour milling from wheat cleaning, basic milling principles, storage and grain handling to milled-grain product additives, plant management and mill mechanics. IAOM offers discounted fees to our members worldwide.

The support of our members throughout the region, and dedication of our Leadership Council and Education Committee propel IAOM MEA's mission to provide continuous education in practical and accessible forms (trainings, forums, online correspondence courses, etc.) to millers in our region.

Thank you and wishing you a wonderful time in Dubai.

Sincerely yours

Ali Habaj IAOM MEA Regional Director Director, Sohar Flour Mills (Oman)

About IAOM

Developing Educational and Technical Proficiency in the 21st Century

The International Association of Operative Millers (IAOM) is an international organization comprised of grain millers and allied trades representatives devoted to the advancement of education and training opportunities in the grain milling industries. Membership consists of individual members who work at milling companies or for the industries that provide products and services to mills. With 12 districts in North America and international regions in Latin America, the Middle East and Africa, Eurasia, and Southeast Asia,IAOM provides an international forum for networking, the exchange of ideas, technical and educational opportunities, and the discovery of new products and services.

IAOM Membership includes

Access to Member-only sections of the IAOM Website

IAOM members enjoy access to special areas of the website where they can search past publications, view and listen to recordings of conference presentations, and search IAOM's online member database.

Subscription to Annual Membership Directory

This user-friendly compendium of IAOM members is not available for sale, and provides the opportunity for networking with other professionals around the world involved in the industry. The Directory lists milling professionals, as well as suppliers who provide products and/or services to the industry. Individual listings include contact names, company names, addresses, phone numbers, fax numbers, websites and e-mail addresses.

Subscription to International Miller

A valuable source of technical information and description of the latest developments in the various areas associated with milling and grain processing. Contributors are highly regarded professionals in their respective fields. International Miller also reports the activities of the association, its districts and standing committees, and other industry-specific news.

Discounted tickets to the industry's premier milling conferences and expos
The IAOM Annual Conference and Expo (in North America) is the premier
educational event for grain milling and seed processing professionals. The annual
event gathers milling and allied trade professionals from around the world for three
days of education, networking and fellowship.

The Annual IAOM Mideast & Africa Region Conference – is where all of the operative millers of the region, as well as their upstream and downstream partners convene. Held in a different country in the district each year, this annual conference attracts the entire African and Middle Eastern regional milling family, which represents the largest wheat usage and consumption market in the world.

The Annual IAOM Southeast Asia Region Conference& Expo – this conference brings together milling professionals from countries across Southeast Asia and the Pacific Rim. The annual event draws milling and allied trade professionals from across the region for three days of education, networking and fellowship.

The Annual IAOM Latin America Region Conference & Expo – the annual technical conference is the meeting place for Latin American milling professionals. The milling community comes together for three days of education, networking and fellowship.

Discounted fees for the leading milling educational resident courses and correspondence courses

The IAOM Correspondence Course in Flour Milling

Completely revised and rewritten by industry veterans and IAOM members, this course has been reorganized into eight units divided into five to ten lessons each. It is suitable for trainees, or it can serve as a refresher course for experienced personnel, and for those in affiliated industries wishing to improve their knowledge of grain milling. Students must successfully complete a test at the conclusion of each lesson. A certificate is issued on the successful completion of each individual unit, with a diploma issued on the successful completion of all eight units. The course is currently offered in English, it will soon be available in Arabic, and Units 1-4are available in Spanish. All other units are being translated into Spanish.

IAOM Resident Milling Courses

IAOM, in cooperation with Ocrim's International School of Milling Technology, offers two weeklong resident courses designed for those who wish to advance their skills or careers in the milling industry. Bühler and Kansas State University offer executive and expert resident milling courses. The Resident Milling Courses provide hands-on instruction by industry experts and experienced instructors.

IAOM Fundamentals of Milling I

Technical training course intended for employees, supervisors and managers closely associated with flour milling plant operations. Participants will be introduced to general flour milling plant operations including the grain elevator, cleaning, conditioning, milling, packaging and warehouse departments. Special focus will be placed on grain cleaning, conditioning and milling equipment role in the milling process and system flow sheets. Wheat quality characteristics and conditioning impact on mill processing will be qualitatively explored. Flour quality specifications and quality measurements will be identified for basic bakery product systems. In addition to lecture and discussions, participants will be engaged in hands on laboratory and pilot scale milling exercises.

IAOM Fundamentals of Milling II

Technical training course intended for employees, supervisors and managers directly associated with flour milling plant operations. Participants will be introduced to a variety of technical and economic analytical tools for milling process evaluation. Technical tools to be presented include product granulation, cumulative ash, step chart development, and flow sheet equipment allocation analysis. Economic tools to be discussed include yield management, divide milling and the impact of moisture on profitability. Selected roller mill grinding, sifting, and purification variables will be examined in depth. Special emphasis will be put on mill balance and troubleshooting skill development during hands on laboratory and pilot scale milling exercises.

Milling Technician Certificate Program

This unique certificate program prepares candidates to work in flour mills as an associate working in many of the areas of the modern mills. Studies will include basic math needed for the mill environment, as well as an overview of equipment, electronics and electricity, and pneumatic fundamentals. Students will be introduced to the milling process, the wheat characteristics and the industry, and the various requirements of the gradual reduction process in making wheat flour. Quality

assessments will be an integral part of studies. At the conclusion of the courses, candidates will complete an internship at a commercial flour mill. All of the college-level courses are delivered via distance learning, allowing students from around the globe to enroll in the one-of-a-kind certificate program for the milling industry.

Electrical Training Course

Working with real world components, students in this "hands-on" electrical maintenance course will learn how to fix electrical problems plain and simple. This three-day electrical troubleshooting and preventive maintenance training was created to bring students up to speed in their electrical troubleshooting skills as quickly and safely as possible, and it was designed to cover the most commonly performed electrical troubleshooting tasks a maintenance technician faces in their job every day in a flour mill. For the novice or experienced electrician, this training course provides a no-nonsense, practical and real world systematic approach to electrical troubleshooting.

Courses Offered Annually

- IAOM Fundamentals of Milling I (Cremona, Italy)
- IAOM Fundamentals of Milling II (Cremona, Italy)
- Mill Maintenance I or II(USA)
- Electrical Training (USA)
- Buhler-KSU Expert Milling
- Buhler-KSU Executive Milling
- Buhler-KSU Curso para Expertos en Molineria (in Spanish)
- Buhler-KSU Curso para Ejecutivos (in Spanish)

Discounted fees for milling educational publications and videos *Publications*

- Cereal Millers Handbook
- Dictionary of Milling Terms & Equipment
- Sanifacs Manual
- Stored-Grain Insects
- Technical Bulletins, Volume II (1937 to 1943)
- Technical Bulletins, Volume IV (1944 to 1975)

Videos

Good Manufacturing Practices in Grain Processing (English and Spanish on one disc)

- Part I Good Manufacturing Practices in Grain Receiving, Handling and Storing
- Part II Good Manufacturing Practices in the Milling Process
- Part III Good Manufacturing Practices in Packaging, Storing and Distributing
- KSU Historical Milling Films
 - 3 films on 1 DVD: The Amazing Art of Flour Milling (45 minutes), Roller Mills in Action (37 minutes), and A Photographic Study of a Sifter Operation (35 minutes)
- 3-part DVD Series on Handling Emergency Situations
 - Video I Strategic & Tactical Considerations of a Grain Elevator Explosion
 - Video II Tactical Considerations at Grain Elevator Fires
 - Video III Agriterrorism

Membership Classifications

Active Member

Any individual who is a professional grain miller and/or seed processor; milling engineer; manager or supervisor of quality control; food protection or safety; mill and other processing facility managers; facility and corporate superintendent who is of proven ability and good character, and who actively engages in grain milling oraffiliated industries at the time of making application for membership in the International Association of Operative Millers.

Associate Member

Any individual who works at a firm or corporation that manufactures products and/or provides services to the grain millingor affiliated industries.

Junior Active Member

Any person of good character and record who is enrolled in the milling science and management program at Kansas State University or a similar field of study at another like school approved by the IAOM Board of Directors.

Member Dues

Active: \$195 Associate: \$195 Junior Active: \$30

All dues paid in US funds and drawn on US bank.

SPEAKER LINEUP

OPENING CEREMONY

IAOM MEA 2017 Dubai - Conference Chairman H.E. Essa Al Ghurair Chairman. Essa Al-Ghurair Investment (UAE)

Mr. Essa Al Ghurair graduated from the San Diego State University in California USA with Business Administration. He serves as the Chairman of Al Ghurair Resources, a major supply chain provider and a key player in the field of agricultural commodities. He oversees the diverse business activities which include the manufacturing and marketing of, edible oils and legumes; and in the trading of food grains, oils and meals. Specializing in industrial manufacturing and commodities trading in international markets, combined with extensive experience has led Mr. Essa Al Ghurair to be a leading figure in industry circles. Essa Al Ghurair Investment LLC (EGI) was founded in the year 2000. EGI is now a Holding Company, comprising of Four Main Business units - Foods, Real Estate, Investment & Venture Capital and Business Development. He also is the Director at Al Ghurair University, National Cement Co. PSC, Chairman at the Tharawat Advisory Board, Tharawat Family Business Forum and he is a Board Member in the Dubai Chamber of Commerce & Industry.

IAOM MEA Regional Director
Ali Habaj
Director. Sohar Flour Mills (Oman)

Ali Habaj holds an M.B.A in Marketing from the University of Bristol, UK and a General Management Program for top executives from Harvard University, USA to add to his credentials. Having worked in Oman for over 23 years in management roles, he possesses rich experience of which he led Oman Flour Mills Co. SAOG and Atyab Investments from 2000 to 2017. During Habaj's tenure in OFM, the company's workforce grew from 220 to 1,500 employees. It was under his leadership that Atyab Investments was created, an investment arm focused on value addition through downstream industries. This is evidenced by a notable achievement in revenue growth from 60 Mn USD in 2010 to 220 Mn USD in 2016. Atyab Investments built Oman's largest industrial bakery and successfully turned around the country's major poultry farms- broiler and layer facilities. In addition to this, Atyab Investments is setting up new milling and Grain silo facilities in Industrial Port of Sohar. During the first half of this financial year the group's profits grew by 47% compared to previous year and this robust growth will be seen in the second half as well. The company will continue with its 5-year vision of investing US \$1 Billion in the food sector. He continues to be involved in the industry thru his role as Executive Board Member and Consultant. He is an active member of the Young President Organization (YPO) holding the office as an Education officer 2014-2015 & Chairman for 2015-2016.

Leader of the Year

Walid Ali Mohamed Saeed

Managing Director, Midstar Commodity Management Ltd

Walid Ali Mohamed Saeed, come from a reputed and renowned Yemeni business family (Al Saeed Family), started his business career by establishing a trading company, M/s. Alsaeed Trading Company (Y.S.C) under H.S.A. (Hayel Saeed Anam Group of Companies) umbrella which started in 1938 with humble beginning in Yemen and grew rapidly to become one of the household name in Yemen. The group expanded internationally into Middle East, Europe, Asia & Africa in order to diversify as well as bring technology and advancement into Yemen from rest of the world to make Yemen a better place. Al Saeed identified the importance of Agricultural Commodity requirement of Yemen which was battling with less resources specially water scarcity which is needed for agro crops and fast growing population needs of food supplies. Al Saeed started with bagged agri-products imports into Yemen and while started with finished products like Wheat Flour & Refined Sugar, today with the vision of Group and strong leadership, importing Wheat Grains & Raw Sugar into Yemen while building one of the biggest capacity of Flour Mills in Yemen with combined milling capacity of 8,250 MT per day, in addition with Silos total Storage Capacity of 410,000 MT and state of art Sugar Refinery with 2,000 MT refining capacity per day. This was a major milestone for Group to cater the need of Agri-products for Yemeni population in order to serve in a cost-efficient manner while changing the transport mode from bagged cargo in containers to bulk cargo in big vessels reducing the transportation costs and then Milling / Refining at Yemen in an efficient way to provide the lower costs product with International Standards. In current situation of war, in addition to supplying essential food products through own network, Group is also working closely with various NGOs including World Food Program to distribute and provide essential food items including food baskets through free WFP voucher system to the needy people of Yemen.

Master of Ceremonies
Rania Ali
TV Presenter & Live Events Host (UAE)

Rania Ali is a bilingual English & Arabic TV presenter, master of ceremonies, public speaker, media & presentation skills mentor, certified TV anchor & presenter from London Academy Media Film TV in London. LAIDIG SYSTEMS, INCORPORATED STAND F22

John Koorn

14535 DRAGOON TRAIL MISHAWAKA, INDIANA 46544-6896, USA

Phone: 574-256-0204, Fax: 574-256-5575 Email: sales@laidig.com, jkoorn@laidig.com

Website: www.laidig.com

Laidig manufactures silo reclaim systems that can be installed in cone and flat bottom silos or domes for applications with larger storage requirements. Laidig's systems excel in providing customized reclaim solutions for materials with special handling requirements such soybean meal, DDGS, and wheat bran. The Laidig Cone Bottom series reclaimers are a solution to reducing or eliminating silo-bridging problems, helping to create mass flow. This maintains a first-in- first-out (FIFO) material distribution, which increases the quality of the stored product, while decreasing the potential for product infestation. Laidig is known throughout the industry for their quality and durability.
